

Some **pointers** on using our Resume formats

1> Name your resume as **<YourName>_<Technology>**

Example: You name is Amit and you are applying for Data Science openings. Name the resume as amit_DataScience.

2> Post downloading the Resume, **go through each and every word in the resume**. Modify it to your taste and skillsets. **Remember your resume should reflect your personality.**

3> We have provided you the Resume formats.

Moment you start adding or updating your information, you would see the resume contents getting distorted. Kindly note, we want you to make, really make your fresh resume, of course by looking at our format. **So make your resume with great patience.**

Some pointers before applying for **any Job in life**

1> Read the **Job description well**.

2> Irrespective you are looking for Internship, part-time Job or full-time Job, **go through the company site well**.

3> Make sure of **undergoing all Internship projects** and getting your Internship Certificate from <https://onlineinternship.suven.net>

4> When applying, always write a short mail-body describing your capabilities and interest towards the Job or Internship.

Word of Caution!!

Never, ever copy-paste your mail body when applying to different job post.

The chances of getting a call are reduced by 81%. That means your resume goes to the bin and you don't get a chance to showcase your skills.

5> **Be positive** when applying for a position. Positive mind frame increases the probability of cracking the coding interview.

6> **Dress well**. Be in formal. Girls please note Sari is traditional not formal dress code.

7> Last, but not the least, **Keep solving coding Internships** on <https://onlineinternship.suven.net> as well solving programming questions on www.hackerrank.com
